Renaissance Schaumburg Convention Center

Electrical Billing Guidelines

1. Electricity will be live within 30 minutes of the show opening and turned off within 30 minutes of the show close each day. If power is needed earlier or later each day, advanced arrangements must be made prior to the show opening.
2. Twenty-four (24) hour service to any outlet will be double the listed price and can only be guaranteed before show opening with advance arrangements for date needed.
3. The services include one outlet. Any exhibitor requiring more than one outlet will need to order multi strips or provide their own.
4. All electrical outlets will be installed on the floor at the back wall of in line booths and peninsula spaces. It is the exhibitor's responsibility to provide access for electrical outlets and electrical panels which may need to be serviced during the operation of the show. Outlets which are overloaded by the exhibitor will be reset one time as a courtesy. Prior to the resetting of the electrical circuit, the exhibitor will have this opportunity to purchase additional power or agree to operate within the limits of their original power order. If the circuit needs to be reset a second time, a 1 hour labor charge will be incurred at the appropriate rate (as listed on page 1) and the exhibitor will be required to purchase the appropriate power at the standard rate.
5. It is the exhibiting company's responsibility to order the appropriate amount of power, or to take the electricians advice while on show site. Viper Tradeshow Services is not responsible for any electrical damage caused to machinery or equipment.
6. To prevent overloading of circuits, exhibitors cannot add wattage except as ordered. Column and or wall outlets are not part of the exhibitor booth space and these outlets will be charged for accordingly.
7. Any exhibitor using power not contracted for will be charged a show rate for the service they are not authorized to use. This includes using any wall outlets.
8. All Service of 208 / 480 volts requires electrical labor for installation, hook-up, and disconnect. Hourly charge will cover all work performed.
9. All exhibitor ordered Standby Labor will be invoiced at the prevailing hourly rate.
10. Labor will be charged for the following categories:
 - a. All distribution of electrical wiring under carpet or flooring.
 - b. All distribution of overhead electrical wiring.
 - c. All motor and equipment hookups.
 - d. Installation or repair of electrical fixtures.
 - e. Installation of electrical motors and apparatus to be energized.
 - f. Motorized hoists, truss and lighting installation.
 - g. Installation and removal of all overhead electrical signs, trusses, motors or apparatus.
11. All extension cords that run under carpet or flooring must be supplied and installed by Viper Tradeshow Services.
12. All wiring utilized for booth work must have a 3 wire grounded cord with a minimum of #14 Gauge wire. If these requirements are not met Viper reserves the right to disconnect the cord and rent the exhibitor the proper equipment as listed on page one.
13. The use of Clip on sign sockets, latex or lamp cord wire in displays or the use of 2 wire fixtures is prohibited.
14. Permit fees may apply.

For Show Management Purposes:

It is mandated that the Viper Tradeshow Services electrician remains on the show floor during the move in and move out process until all electrical needs have been performed. As part of any electrical service ordered, Viper Tradeshow Services will supply an onsite electrician for the first two hours of the first day your event is open. After that it is up to your discretion whether or not to employ an onsite electrician at your expense (cost outlined on page 1). The Stand-by Electrician is there for the safety and convenience of your, your exhibitors and the attendees. If you elect to waive this service and an issue does arise that dictates that an electrician is needed, the electrician will be summoned to the center, with the cost for that labor being charged to the show management invoice at the published labor rate. A 4 hour minimum will be applied to this labor call. If you have any questions regarding the Stand-by electrician and the waiver, please contact Viper Tradeshow Services.

Neither Viper Tradeshow Services nor the Renaissance Schaumburg Convention Center are responsible for voltage fluctuations or power failure due to temporary conditions or loose connections. For your protection you should install surge protection or over/under voltage protection on your equipment

Under no circumstances can the electrical pricing be changed without the written approval of Viper Tradeshow Services and the Renaissance Schaumburg Convention Center and Hotel. All orders must be received on the Viper Tradeshow Services electrical order form.
